

Q2 Operations Review

Decision brief for the fictional Northstar leadership team

NET REVENUE

\$8.4M

6% above plan

ON-TIME DISPATCH

94.2%

+1.4 pts vs Q1

ORDERS

65,900

+8% vs Q1

What changed

Net revenue reached \$8.4 million, 6% above the operating plan. The West region combined the strongest on-time dispatch rate with the lowest return rate.

June closed the quarter with the strongest monthly revenue. A packing-system interruption created a short-lived backlog, but most affected orders cleared within one day.

DECISION FOCUS

Approve the carrier-capacity reserve before the August demand window, and keep the new certificate-expiry control in the weekly operations review.

Reporting basis: net revenue unless a visual or note explicitly says gross bookings.

Regional Performance

Native-text operating table with quarter totals

Region	Net revenue (\$M)	Orders	On-time (%)	Return (%)
Northeast	2.4	18,400	95.1	2.2
Southeast	1.8	14,700	92.8	2.7
Central	1.9	15,200	93.6	2.4
West	2.3	17,600	95.4	1.9
Total	8.4	65,900	94.2	2.3

Table note: Total on-time and return rates are order-weighted. Values are rounded to one decimal place.

Operating readout

West led on service quality at 95.4% on-time dispatch and a 1.9% return rate. Northeast remained the largest regional revenue contributor at \$2.4 million.

Monthly Revenue

Raster chart - read the labels on the bars

Quarter pattern

Revenue increased in each month and June was the strongest close. Exact monthly values are available only in the chart labels above.

Product Mix

Raster chart on a gross-bookings basis

Q2 gross bookings product mix

CORE PLATFORM 45%

PRO ANALYTICS 35%

SERVICES 20%

Gross bookings represented: \$10.5M

Percent labels are part of the raster chart.

BASIS CAUTION

Gross bookings are measured before cancellations and refunds. The \$10.5M total and its product shares are not directly comparable to Q2 net revenue.

NORTHSTAR OPERATIONS

SCANNED INCIDENT MEMO

DATE: JUNE 15, 2026

SUBJECT: JUNE 14 PACKING SYSTEM INTERRUPTION

At 14:08 PT, the packing barcode service stopped accepting new sessions after its service certificate expired. The outage lasted 47 minutes and delayed 320 customer orders.

Operations rerouted priority orders to the Central facility.

Ninety-one percent of delayed orders cleared within 24 hours.

No customer data was exposed and no orders were lost.

ROOT CAUSE: Expired barcode-service certificate.

CORRECTIVE ACTION: Add a 45-day certificate expiry alert and a weekly validation check owned by Platform Operations.

Prepared by: M. Chen, Incident Lead

Capacity Pressure Test

Follow the raster flow diagram, including the exception branch

Carrier capacity pressure-test

Exception branch requires both amber steps.

Control note: green represents the standard route; amber represents the controlled exception route. Sequence labels are contained in the diagram.

Risk Register

Native-text table of open operational risks

ID	Risk	Likelihood	Impact	Owner	Mitigation
R-01	Forecast volatility	Medium	High	Finance	Weekly forecast refresh
R-02	Barcode certificate	Low	High	Platform	45-day expiry alert
R-03	Carrier capacity	High	High	Logistics	Reserve 12% partner capacity by Aug 15
R-04	Return-rate drift	Medium	Medium	CX	New reason-code audit

Priority rule: a High likelihood plus High impact rating requires a dated mitigation and weekly review until reduced.

Leadership action

Carrier capacity is the only open risk rated High for both likelihood and impact. Logistics owns the dated mitigation.

Appendix: Measurement Basis

Definitions for responsible cross-page comparison

NET REVENUE

Recognized revenue after cancellations, refunds, discounts, and transaction taxes.
The Q2 total in this review is \$8.4M.

GROSS BOOKINGS

Booked order or contract value before cancellations and refunds. The product-mix visual uses \$10.5M of gross bookings.

COMPARISON RULE

Do not subtract gross bookings from net revenue and label the difference as leakage, margin, or lost revenue without a reconciliation by accounting basis.

OPERATING RATES

On-time dispatch and return rates are order-based operational measures. They are not percentages of revenue.
